

Data management review

1. MDEP: What is it and five key things to pass on to your people about the program.

2. Mojave GIS Data group meeting update:
 - The first meeting will be cohosted with CVAG
 - The meeting will take place at the ESRI headquarters in Redlands
 - The date frame will be between May 16 to June 9 but agenda and detail will come out in early April to allow planning.
 - It will be a one day meeting.
 - County, State and Federal GIS and Data Managers from around the Mojave have stated and are planning to attend.
 - Meeting will focus on various agency products, goals, tools being used and knowing who is doing what in the Mojave with ability to contact and collaborate.

3. SharePoint 2010 Enterprise edition installed and running:

The screenshot shows the ArcGIS Map Web Part interface. The top navigation bar includes 'Site Actions', 'Browse', 'Page', 'Application', 'Layer', and 'Symbols'. The main area displays a map of Redondo Beach, California, with a 'Scheme Options' dialog box open. The dialog box has the following settings:

- Renderer: Class Breaks
- Attribute: Sales
- Classes: 3
- Color Scheme: Default Symbol
- Selected Class: 2.51 - 4.21

Below the map is a data table with columns for address, city, state, zip, sales, and target.

Address	City	State	Zip	Sales	Target
13401 E 165TH ST	CERRITOS	CA	90703	1.9	1
3501 DEL AMO BLVD	LAKEWOOD	CA	90712	2	1
16696 AVALON BLVD	CARSON	CA	90746	0.9	1
465 E DUARTE RD	MONROVIA	CA	91016	3.1	2
20999 VANOWEN ST	LOS ANGELES	CA	91303	4.2	3.5
16077 VICTORY BLVD	LOS ANGELES	CA	91011	1.1	1

The screenshot shows a SharePoint dashboard with several data visualization components:

- ShipCountry Table:** A table listing countries and their sales data.
- CustomerID Table:** A table listing customer IDs and their sales data.
- Sales by Country:** A line chart showing sales trends for various countries.
- Total by Country:** A bar chart showing total sales for various countries.
- Sales By Cities:** A bar chart showing sales for various cities.
- Summary Tables:** Three tables providing detailed sales data for ShipCountry, Row Labels, and another set of Row Labels.

ShipCountry Table:

ShipCountry	Germany	Brazil	Switzerland	Venezuela	Austria	Mexico
France						
USA	Sweden	Finland	Italy	Spain	UK	Ireland
Canada	Argentina	Belgium	Portugal	Denmark	Poland	Norway

CustomerID Table:

CustomerID	VAFFE	FAMIA	WARTH	...
SANTG				
ERNSH	ISLAT	TOMESP	GODOS	PF
OCEAN	BOTTM	LONEP	DRACD	AT

Sales by Country Table:

ShipCountry	Sum of Freight	Sum of Subtotal
Canada	44.17 \$	1,802.25
Ireland	42.11 \$	2,036.06
Spain	2.04 \$	86.50
Sweden	63.36 \$	1,810.00
UK	11.42 \$	1,405.20

Row Labels Table:

Row Labels	Sum of Subtotal	Sum of Freight
Bergamo	3491.00 \$	200.58
Caracas	1101.2 \$	66.28
Leipzig	1200.8 \$	125.77
San Cristóbal	3242.82 \$	266.33
Seattle	2018.1 \$	27.81

Another Row Labels Table:

Row Labels	Sum of Subtotal	Sum of Freight
Bergamo	3491.00 \$	200.58
Caracas	1101.2 \$	66.28
Leipzig	1200.8 \$	125.77
San Cristóbal	3242.82 \$	266.33
Seattle	2018.2 \$	27.81

Data management review (cont.)

4. MDEP has been running Arc Server 10 for the past six months.

- A government view web map will be developed for agencies to view data to help in decision making
- Arc Mobile is operating well with significant tools being added in 10.1 to allow greater data reporting
- Maps such as the CLAWG have been updated to the new format for greater functionality and ease of use

5. Mobile app update:

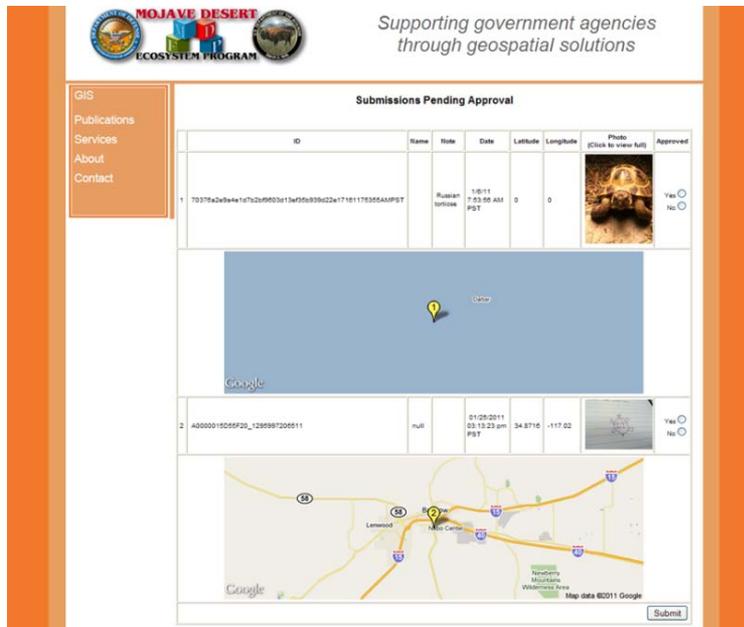

- California Desert dot gov will be our next app to come out in April on the iPhone and Android:

Data management review (cont.)

5. Mobile app update (cont.):

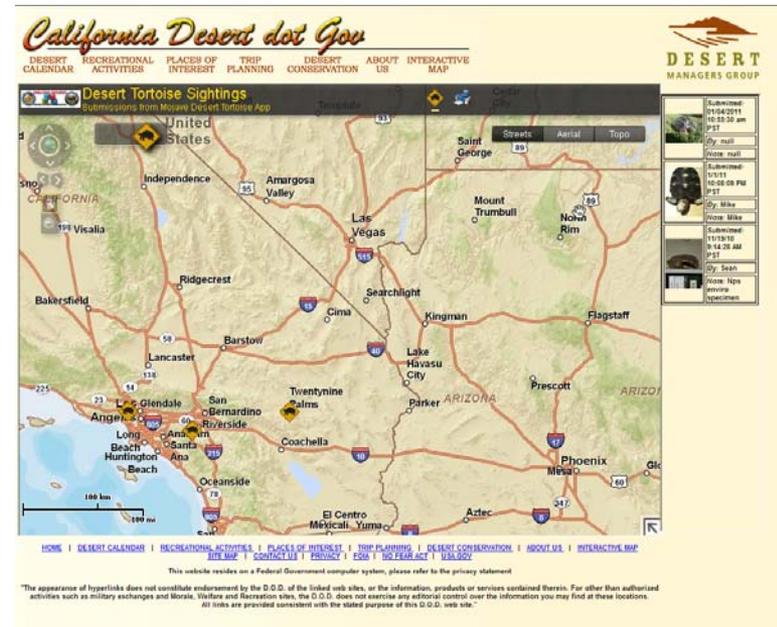

- Desert tortoise app is 100% completed with all processes and databases in place
- First real field submission taken on the 17th in Palm Springs
- Public viewing site is up and operation on www.californiadeserts.gov

6. Mobile ESRI iOS for sharing map data with the public:

- ESRI release of Arc GIS iOS for smart phone has provided a new way agencies to share map data with the public they serve with great ease.
- Through Arc Server 10, layer services can be created to allow the public to access through the iOS. Examples of layers are approved walking trails, parking, park benches and items that are handed out on paper maps.
- Data that changes temporarily or seasonally can be updated on all who have the iOS when the updates are loaded into the server.
- The iPhone is currently out, the Android is coming in the next two months and MDEP knows of a way to provide these services through Blackberry phones.
- MDEP can host these services so the public can consume these layers with great ease.
